B.Tech Engineering   2019 – 2023
- CGPA: 7.4/10

Work Experience

E-Commerce Website - Full Stack Developer, Remote   Jul 2024 – Now
- Redesigned and optimized the entire dashboard, store layouts, and checkout page, enhancing user experience and performance.
- Optimized checkout performance, reducing load time by 20%, leading to a 15% increase in conversions.
- Built reusable React components and email templates, reducing development time by 25%.

Freelance - Full Stack Developer, Remote   Mar 2022 – Now
- Designed and developed responsive websites from scratch, ensuring clean UI/UX and smooth animations.
- Managed end-to-end project execution, from wireframing and prototyping to deployment and maintenance.
- Worked with version control systems like Git for efficient project management.

Mentra.gg - Frontend Developer, Remote   Jan 2024 – Jul 2024
- Took full responsibility for developing a website from scratch, ensuring a clean and responsive frontend with smooth animations - Entire UI/UX design was created by myself.

Projects

Crypto Bio-Page - myaddys.net | User Count: 10k+   **Accquired**
- A typical bio link page, but not just for social media—it also allows users to share and list their crypto addresses to accept payments.
- Developed the entire project from scratch, setting up MongoDB as the database and independently creating and designing the UI/UX in-house.

PulseProxies - pulseproxies.com | User Count: 5k+   **Accquired**
- A proxy selling website offering IPv4 and IPv6 proxies, featuring an inbuilt proxy generator that allows users to create the desired number of proxies instantly.
- Designed and created the entire UI/UX and all graphic assets.
- Implemented Stripe and Sellix payment for crypto payment gateway for seamless transactions, ensuring proper error handling without compromising application stability.
